A proof labeled "Preview" from Campaign Monitor must be approved prior to mailout

SCREEN SHOTS

On Windows, a screen shot is made using the Ctr-Print Screen key combination (which places the image on your clipboard), pasted in a Paint application and saved as an image file. On Mac, command -3 will place a screenshot on your desktop. If the HTML is larger than your monitor, please supply multiple shots (combined or separate).

WHAT GETS SENT OUT

Finished HTMLs are sent out via Campaign Monitor as emails to our contact list. The width of the enclosing table is 700 pixels. Due to Campaign Monitor's HTML optimization and parsing, this email may not appear exactly like your original document.
